Update concerning the dire renovation of the «Gustitos del Cura »

The urgent appeal launched by Padre Xavier Arbex has got a warm reception. The generosity of some donors made possible to gather the minimum amount required to start the works.

This is fantastic. Sincere thanks to all the donors.

However, now, the first days of November, the donations collected or announced so far are still far from covering all the costs for the Gustitos del Cura glacier/cafétería refurbishing. As a reminder, Gustitos is the main financial source of Apronia-Peru and therefore a direct provider of the «Principito» home.

On the filed, works have been underway since September. The neighboring premises have been used to go on with the business. The laboratories have been transferred. The defective roof was dismantled and the materials evacuated. Now it is time to rebuild the roof. Everything seems to go its way according to forecast.

Any additional financial assistance will be transformed into renovated space, a safe roof, standard facilities and, in turn, through the benefits of the renovated business, into resources for children's homes. Thank you in advance.
